

SHANG HAI LANQIANG MACHINERY CO., LTD.

About the company

Company Brief

- Shanghai lanqiang machinery co., ltd. was established in 2003.
- It is shanghai lanxia industrial development co., ltd.
subordinated machine manufacture and the export processing
company.
- It has a registered capital of 5 million RMB.
- Since set up the production value above 10 million RMB every
year.

Main Business

Export machining:

Mostly export to USA, Japan, Singapore, Canada, Colombia and etc., at present, especially Japan.

Machining:

Mostly Japan Singapore and the foreign capital enterprise processing mechanical spare parts according to CAD picture.

Powerful Technical Support

- Shanghai Lanqiang Machinery Co., Ltd. has many speciality operation staff who has many year experience in machining area.
- This company has 8 over advanced technic expert mechanical and electrical engineer, and has general designed capacity in machine equipments area.

Our Tenet

- We through our successful experience until now, always for customer requirement to let customer satisfaction on the product quality, the price and the date of delivery.
- Our target is really sincere hope more foreign capital enterprises are also willing to establish the new partner relations with us.
- We insists make customer satisfaction and the trust as management objective.

Advanced Equipments

Under the Shanghai Economic committee's help in 2007, for the company's project development, import the equipment for production in the project successfully; the major equipments are HASS vertical machine center and HASS horizontal machine that made in USA.

Vertical Machining Center

Horizontal Machining Center

Advanced Equipments

- Vertical Machining Center Table size is 1372 mm × 635 mm, travels 1016 mm × 660 mm × 635 mm, max weight on table (evenly distributed) 1588 kg, accuracy (1 axis) ± 0.0025 mm.
- Horizontal Machining Center is double table; table size is 500 mm × 500 mm, travels 813 mm × 508 mm × 711 mm, pallet changer max pallet load 454 kg, accuracy Repeatability ± 0.0025 mm, double work table, suits batch product loading and unloading not conveniently, and uninterrupted work.

Horizontal Machining Center

General Equipments

Number obviously milling machine made in Beijing, X:900 mm, Y:260 mm, Z:300 mm.

Number obviously milling machine made in USA, X:975 mm, Y:415 mm, Z:490 mm.

Numerical control lathe, CK6150L-750.

Self-made machine-finishing
unit clamp

Perfect Quality Control

This company also has Japanese quality control pattern completely department, quality control continues to use Japan pattern completely.

Company best quantity control system also obtained foreign capital enterprise's approval, has formed the good partner mutually.

At present, undergoes the inspection, the American metal products interlink LLC also thought that our company had has produced the high accuracy components for their company ability.

Precision Machined

General Products

Shanghai Lanqiang machinery Co., Ltd. specializes in the project is as follows:

The precise pouring casting (Loses the wax casting) parts, the material may be the carbon steel, the stainless steel, the nodular cast iron and so on, in the picture the parts biggest 600 g.

Loses the sacrificial casting

General Products

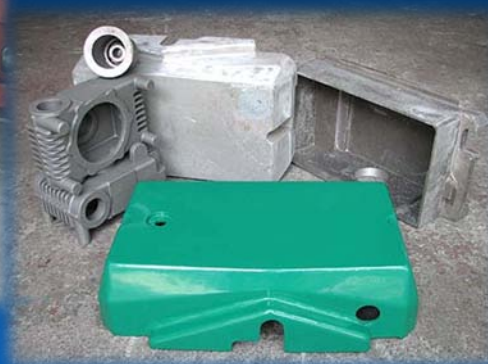

Each kind of founding, the maximum weight is 500 kg, the material may be the nodular cast iron, the gray iron, the aluminum alloy.

**FC200FC400 Cast iron
Auto car parts**

**FC200 Cast iron before export
Parts export to Japan**

**Cast-aluminum
Parts export to Japan**

General Products

Generally the pouring casting (cast steel); the material may be the carbon steel, the alloy steel, the stainless steel, the parts biggest 1.5 T.

Cast steel
Rolling mill equipment parts

Machine-finishing components

Half-finished product examination

General Products

The aluminum alloy presses the casting, has 500 T and the following press.

Presses the cast-aluminum
JUKI and SINGER oil reservoir

Surface painting Technics

This company has experience in overseas enterprise order form for many years, in CAD production and then assembles to export etc., for the overseas enterprise's complete set of products with parts and assembles cooperation, had already formed by this company production processing and the cooperative production chain, namely from semifinished materials gathering, by the machine-finishing, simultaneously may carry on the surface treatment, including the painting, plates models.
